The Computer Security Subcommittee (CSS) of the USIB

Security Committee is developing proposed minimum security

requirements for operation of Intelligence Community computer

systems in a multilevel security mode. The CSS is also preparing

an analysis of the threat to computer systems and computer-based

data. Its efforts toward establishing a Community-sponsored

computer security training course has a projected activation

date of mid-FY 1971. The Chairman, CSS has been appointed

as a consultant to the task team planning a security analysis,

test, and evaluation of the DIA Analyst Support and Research

System (ANSRS).
